THE SAVINGS DEPARTMENT

If more people knew how the first two or three entries in a Savings Book help and imulate the owner to make additions, unthe habit of regular saving becomes a thing of pleasure as well as of prudence, fewer people would be caught out in the wet when the inevitable "rainy day" comes.

RECESSION IN STOCKS CAUSES A RE-NEWAL OF APPREHENSION.

Losses Range from Two to Three Points in the Leading Active Issues-Money in Fair Supply.

NEW YORK, June 15 .- Prices for securities had a decided backset as a result of today's trading. Pressure developed from and small fractional rallies the level of prices sank lower throughout the day and the close was heavy at the lowest. The stocks in which the great bulk of the trading occurred have lost all the way from two to three points from Saturday's level. This includes the principal coalers, grangers, Pacifics and Southwesterns. The question of whether the market was on the eve of a revival of speculation for the advance was thus decisively answered and there was a corresponding relapse in prevailing sentiment about the Stock Exchange into despondency and apprehension. There was no very important development of news to account for the renewed decline, but it was obvious that the urgent demand from the uncovered short interest had become mostly satisfied, while the investment demand had dropped out with a sharp recovery in prices from Wednesday's low level. There was some large selling early in the day, which had the apeparance of realizing on speculative accounts which had been secured at the low levels. London took part in the selling and Western wire houses also sent orders on an important scale. The selling was not so large later in the day, but prices yielded with resisting power and no attempt was perceptible to support the market.

The result is to open up former doubts about the motive of the selling and the extent to which liquidation may now be pursued on the decline. Most of the current discussion had to do with factors in the situation which were already in force before the previous decline was arrested last Merchants' H. & L. Co. fives. crop, which fell into the background in the on wheat, came into play again to-day, and that crop. Last week's feeling that the culmination of the Western floods left that factor amply discounted gave place to-day to the realization that statistics of railroad earnings from that region for several weeks traffic and then large expenses for repairs of the damage caused by the floods. The assembling of the coal miners' convention and the extension of the lockout in the New

York building trades revived anxiety over the labor outlook. Money was easy, but sterling exchange recovered here and ran off sharply both in Paris and Berlin. As a consequence there was close calculation over an export of gold by to-morrow's steamer keeping alive expectation on this point. The market closed, however, with no announcement of any enshown by the banks in Saturday's statement leaves the surplus reserve still at a low level for this season of the year and there is a disposition to await with great the controller for June 9 of the condition of national banks throughout the country. The inference from the foreign trade statement for May, which shows a falling off in total exports compared with last year of over \$2,000,000, is that our exports of manufactured products are declining, as the exports of agricultural products are slightly above those of last year. The bond market was dull but irregular. Total sales, at part value, were \$1,275,000. United States bonds were all unchanged on

The principal factor in the situation was the bad condition of crops reported from abroad, the Hungarian report being especially bullish, while in France and England the crop was reported badly damaged by rain. A decrease in the visible supply was also a strengthening influence. With a good demand from shorts and on buying for long account, September advanced to 73%c and closed at 73%@73%c, a gain of %c for the day. After selling up to 76c, July closed %c higher, at 75%@76c. Clearances of wheat and flour were equal to 249,200 bu. The amount on passage decreased 696,000 bu. Primary receipts were 460,000 bu, against 605,700 a year ago. Minneapolis and Duluth reported receipts of 428 cars, which, with local receipts of 19 cars, one of contract grade, made a total of 457 cars, against 450 last week and 462 a year ago, Trading in corn was only moderately ac-

tive, and the feature early in the day was changing from July to September by ele-vator people. The market was easier at the opening under the influence of favorable weather and liberal receipts, but the strength of wheat and a fair cash demand caused a better feeling later. The close was firm, with July 1/4c higher at 48%c, after selling between 481gc and 48%c. September closed 1/4c to 1/8c up at 47% 2/48c. profits. Offerings were in excess of requirements, and the market declined. Later the demand became more urgent, and prices advanced and closed steady, with July a shade higher at 38%c, after ranging between 334c and 33%c. September was up a fraction at 33% @33%c. Receipts were 184 cars.
A big run of hogs and a decline of 10c in in provisions at the start, but with a fair demand later and light offerings the market steadied around Saturday's closing figures. There was also a greater variety of grades represented than usual on Monday, but only a small percentage of the offerings were good enough to sell around top prices in their class. In harmony with unfavorable reports from surrounding markets the local houses represented and a very fair request for shipping account, the offerings were changing hands. Sales indicate that prices were irregat 54%c; December, 53%@53%c, closing at ular, and on that account more unsatisfactory to salesmen. There is no doubt that cattle for which there was much competition sold in a number of instances as high as equal kinds were selling at the close of last week, but in many other cases sellers reported a decline of 10c, and there is probably no doubt that it was the intention of buyers to get all of their purchases lower. The bulk of the supply was steer cattle, and included nine loads of "sloppers." It must be admitted that on account of the uneven quality it was very difficult to draw an accurate line on the market compared with the close of last ST. Hogs-Receipts, 2,500; shipments small. There was a very fair improvement in the receipts of hogs to-day compared with a week ago, fully twice as many as a year ago, and the supply was comparatively large for a Monday market. Reliberal receipts and lower prices, and this also had its effect here. Therefore, the conditions were favorable to buyers, and salesmen were in did not have many orders at the prices they would be forced to pay, and sellers had to de-pend upon local packers to take the supply. After a trading basis had been established, which was generally fully 10c lower than the close of last week, packers took hold freely, and the usual good clearance was made in proper season. Occasionally sales looked to be almost 15c lower than some of the high transactions at the close last Saturday, but there were hardly enough at such terms to be considered a criterion of the market. Sales ranged from \$5.90 to \$6.25, and most of the supply sold at \$6.05@ 6.121/2. Quotations:
